Markdown Preview Enhanced

Sponsors

This extension is sponsored by [New Relic Codestream](#). Enables you to pull requests and review your code in your IDE of choice.

Introduction

Markdown Preview Enhanced is a VS Code extension that helps us by providing many crucial functions. Some of these include: [pandoc](#), [PlantUML](#), [code chunk](#).

Essential Reading

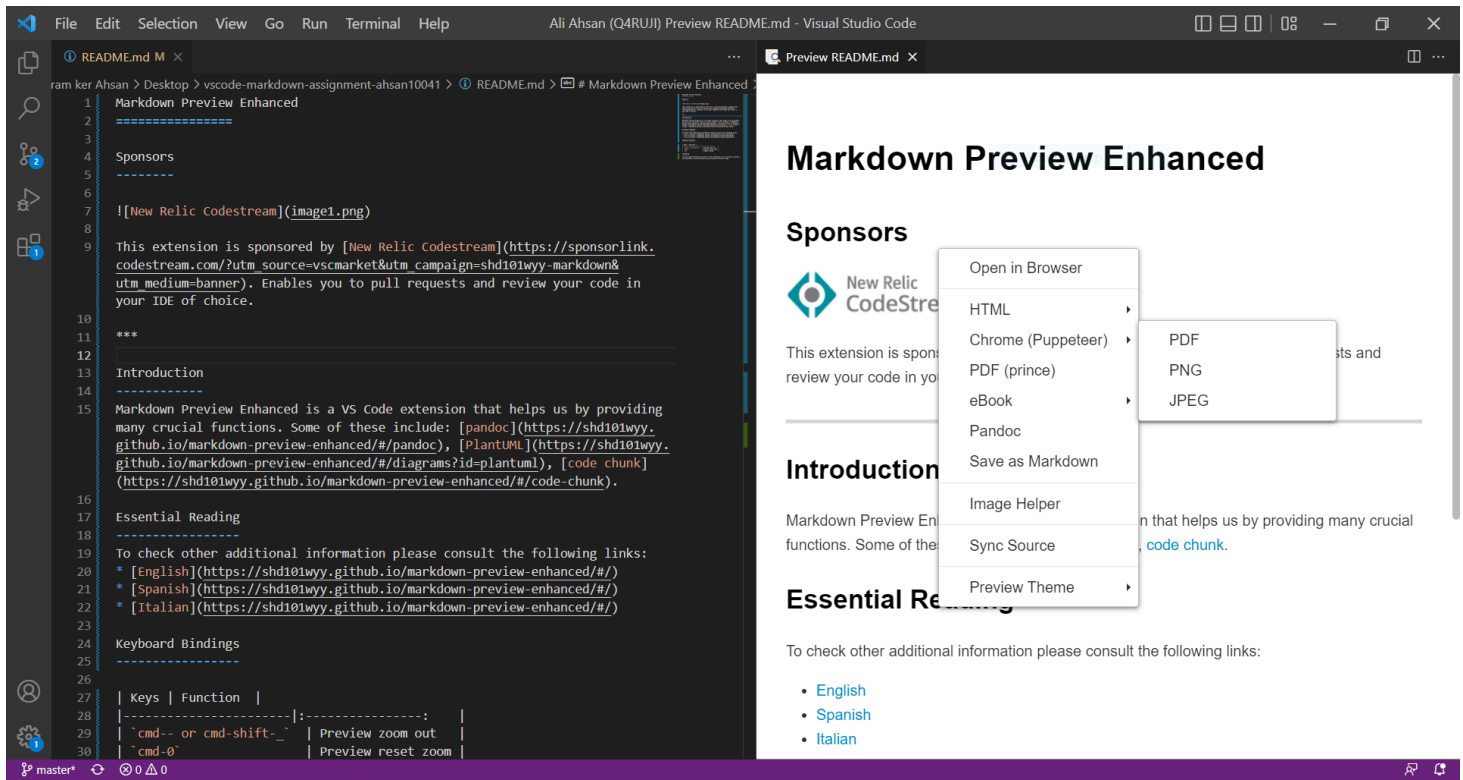

To check other additional information please consult the following links:

- [Spanish](#)
- [Italian](#)

Exporting Markdown file as PDF

In order to convert your '.md' file to PDF format, right click on the preview window on the side, select Chrome (Puppeteer) button and from the drop-down menu select PDF.

This will create a .pdf file in the same path as your .md file. A screenshot below is attached to demonstrate this process.

Keyboard Bindings

Keys	Function
cmd-- or cmd-shift- <u> </u>	Preview zoom out
cmd-0	Preview reset zoom
esc	Toggle Sidebar

Changelog
